

BAI YU

HKU Year 4 Computer Engineering | Software Engineering · Applied AI

3454833326@qq.com | +86 173 0582 6764 | Hong Kong / Hangzhou
baiyu-ce.github.io

EDUCATION

The University of Hong Kong | Computer Engineering

Faculty of Engineering · Year 4 | 2023 - 2027 (expected June 2027)

Coursework: programming, data structures and algorithms, AI, machine learning, deep learning, discrete mathematics, optimization and simulation.

INTERNSHIP EXPERIENCE

Wuxi Longsheng Technology Co., Ltd.

Digital Information Department Intern | Wuxi | 14 Jul - 24 Aug 2026

- Contributed to an APS scheduling analysis service that accepts fixed-format Excel files through WorkBuddy MCP tool calls.
- Helped standardize interactive web charts and output templates for consistent presentation across users.
- Helped package Java services with Maven and deploy the APS backend and MCP service through 1Panel on an always-on intranet server, enabling remote SSE-based MCP access.

Sunyard, Hangzhou

AI Development Intern | Hangzhou | Jun - Aug 2025

- Built conversation interfaces, agent configuration pages and task dashboards for a banking AI agent platform using Vue 3, TypeScript and Element Plus.
- Refined prompts and restructured tool-calling workflows to address hallucinations and failed tool calls.
- Implemented responsive layouts and interactions, and contributed to product and performance optimization.

PROJECTS & UNIVERSITY PROGRAMS

Emotion Recognition Model | Yonsei University WAY Program

27 Dec 2024 - 17 Jan 2025 | Python · TensorFlow · Colab

- Trained a model on a Kaggle emotion dataset and explored AI in design workflows. Awarded full marks for the project.

Monte Carlo Simulation | Peking University Globex 2024

Jul - Aug 2024 | Python · MATLAB

- Modeled stochastic queueing, network and inventory systems; studied random number generation, discrete event simulation and output analysis. Combined assessment: 82/100.

VOLUNTEERING

Renwen School, Toronto, Canada | Volunteer / Teaching Assistant

Jan 2020 - Oct 2021

- Supported classes and homework sessions, organized a programming club introducing Python, and discussed learning progress with parents.

SKILLS & ADDITIONAL INFORMATION

Development: Python, C++, Java, TypeScript, Vue 3, Element Plus, Maven, 1Panel, MCP, SSE.

AI & data: TensorFlow, PyTorch, Scikit-learn, prompt engineering, Monte Carlo simulation, MATLAB, Excel / VBA.

Languages & awards: Chinese, English; IELTS 6.5 (Listening 7.5, 2023); Euclid Mathematics Contest, top 25% (2022).
